**Postmortem Examination Review Summary #2026D03**

Horse Information: Four-year-old Thoroughbred.

Incident Summary: The horse was pulled up during a morning breeze due to a left front leg injury. The horse was diagnosed with a left shoulder fracture and was humanely euthanized.

Necropsy Summary: A necropsy examination revealed a complete, displaced, comminuted neck and axial fracture of the left scapula. On the spine of both the left and right scapulae there were subperiosteal bone calluses, and the left scapular callus intersected the fracture line.

Racing/Training History: This horse was a non-starter with only recorded works.

Veterinary History Summary: The horse suffered a right shoulder fracture in 2023 and was given time off. The horse had left front lameness concerns documented in October 2024 and again in January 2025.

Pre-race Examinations: The horse passed all pre-work examinations performed by the attending veterinarian.

Conclusion: The horse suffered a catastrophic left shoulder fracture during a morning workout.
