**Postmortem Examination Review Summary #2025L05**

Horse Information: Eleven-year-old Thoroughbred.

Incident Summary: During morning training, the pony horse sustained an injury to the left front leg. Radiographs revealed a fractured left humerus, and the horse was humanely euthanized.

Necropsy Summary: A necropsy examination revealed a spiral left humeral fracture that intersected a subperiosteal callus.

Racing/Training History: The horse had been a pony horse for the last four years and worked escorting racehorses to and from the barn and racetrack five days per week.

Veterinary History Summary: The pony horse received routine wellness care.

Pre-race Examinations: N/A

Conclusion: This horse suffered a catastrophic left humeral fracture that intersected a subperiosteal callus.
