**Postmortem Examination Review Summary #2025E14**

Horse Information: Three-year-old Thoroughbred.

Incident Summary: After completing a morning breeze the horse suffered a catastrophic left humeral fracture. The horse was humanely euthanized.

Necropsy Summary: A necropsy examination revealed a catastrophic left humeral fracture.

Racing/Training History: The horse had six lifetime starts. There was a gap in works from 3/25/24 until 9/27/24.

Veterinary History Summary: The horse had a history of a left front medial splint bone fracture in 2023, and right knee surgery in 2024.

Pre-race Examinations: Pre-race examinations had noted joint capsule hypertrophy and a decreased range of motion in both front fetlock joints. Exostosis of the medial left front splint bone was noted in exams.

Conclusion: This horse suffered a catastrophic fracture of the left humerus.
